

Figure S4. External resource evidence matrix

Counts are shown within each resource-specific denominator; rows are not plotted on a shared quantitative axis.

Resource	Evidence question	Result	Interpretation
Open Targets	Disease-context targets with UC/IBD support	21/22	Target-disease context
Open Targets	Disease-context targets with genetic evidence	6/22	Limited genetic support
PubMed/full text	Curcumin-gene records with bibliographic trace	25/25	Literature traceability
ETCM2	Mapped ETCM2 genes overlapping HERB context	0/5	Partial target-name overlap
L1000CDS2	Exact-identifier top-result hits	0/15	No top-result recovery
